DELAY

In Securing Building Material

Has Retarded People's Hard Rubber Co.

The New Factory In the Every gown was selected so that it East End.

Been Wasted.

The plant of the People's Hard Rubber will not be in operation as early as was expected. There has been a delay in securing building material and the work has been retarded. At fancy of men and is copied and rethe company's office it was stated that it was not known just when the factory could be put in operation.

Messrs. Haber, Stein and others interested in the new rubber factory for East Akron, have lately held a conference with Architect F. O. Weary, regarding plans for the plant. These are now being prepared. The capacity of the shop will be about half that of the Buckeye Rubber Co., it is said, The new company plans to begin on a somewhat smaller scale than certain reports have stated, but plans to grow and will no doubt do so.

That the rubber sesources of Colombia have been wasted by natives cutting down trees for rubber instead of tapping them, there seems to be no doubt. The India Rubber World says: The rapid decline in the Colom1 bian production of rubber gave no concern to consumers, for the reason that discoveries of rubber were being made elsewhere at a rate which gave a steady impetus to the world's total production. New fields have been opened constantly elsewhere in South America, and the enormous output from Africa has occurred almost wholly since the palmy days of rubber collection in Colombia.

But the situation in Colombia is peferred to here as affording an object lesson which, ultimately, must be considered seriously throughout the rub- form and an expressive countenance, tenderness, hope and eloquence in all is instilled in us all. We are a thrifty ber world. The caucheros of Colombia clothing will look well on one woman homes she approaches." But how people and would be horrified to see and more accessible rubber districts of that country, than they descended to Ecuador, and, following the principal streams, repeated their work of destruction in that country. Thence they entered Peru, Bolivia and eastern Brazil-everywhere, without molestation, carrying on the work of extinguishing the rubber tree.

Eleven years ago the United States consul at Para, Major Kerbey, reported to his government:

The Peruvian rubber or caucho forest are already fast disappearing, and the nearest are now far away. The practice of felling the tree to the trees near the rivers, except far up on the Ucayali and Javary rivers. It is affirmed that extensive tracts of forests have not yet been touched, but that they are difficult of access on account of the distance from the rivers and the lack of roads. It is perfectly safe to assert that in the near future all the available caucho forests of Peru will have disappeared unless other methods are speedily

NEW YORK SOCIETY IS

DEBATING THE SUGGESTION THAT \$300 A YEAR IS ENOUGH FOR DRESSES

New York, Oct. 28.-The assertion by Mrs. Theodore Roosevelt, mistress of the White House, that \$300 a year is sufficient for a woman to dress well in society, is a predominant topic of discussion among New York women of fashion.

Mrs. Roosevelt's plan was, briefly, to wear black and white almost exclusively for evening and street wear. would wear with slight repairing for three seasons. These gowns were of the richest and heaviest silk. When they would no longer permit of remodeling they were made into waists. Why should not the leading lady of any country be a good dresser? It is her duty to be well and elegantly dressed. For her to be parsimonious in that respect is to wrong many an honest bread-winner.

Let every woman dress according to her means. A woman outside the fashionable world can gown herself acceptably on \$300 a year after her wardrobe is founded, as it were. Some do it by patronizing sweatshops, others by home dressmaking.
